## Get More Done

YesNo.com's Hosted Exchange even enables remote workers to be connected to their company by instantly delivering any changes to email, calendar and contacts. In addition, you can grant other people on your team access to your mailbox and calendar when needed.

YesNo.com's Hosted Exchange gives your business a better way to share email, calendar and contact information so you can get more done.

With YesNo.com's Hosted Exchange you will be placed at the heart of your business, enabling you to stay consistently connected to your customers and colleagues.

### Shared Calendars Outlook

Arrange appointments with ease by viewing your colleagues free and busy schedules, sending invitations, and tracking responses, with details entered automatically into colleague's calendars instantly.

### Shared Contacts Outlook

Create centralized contact information for customers, partners and co-workers, which can be easily accessed by everyone in your company.

### Public Folders Outlook

Manage your projects with the ability to view shared documents, timelines and assignments while tracking tasks that are active, completed and overdue.

YesNo.com's Hosted Exchange enables you to maintain access to all messaging features – email, calendars, contacts and tasks – even when offline or over slow Internet connections.

**"YesNo.com have hosted Blooroom's email since 2001, they've been great which is why we're still using them 6 years later."  
Jon White Blooroom interactive**

## Access your email anytime, anywhere

With YesNo.com's Hosted Exchange you can access your email at anytime and from any computer with an Internet connection.

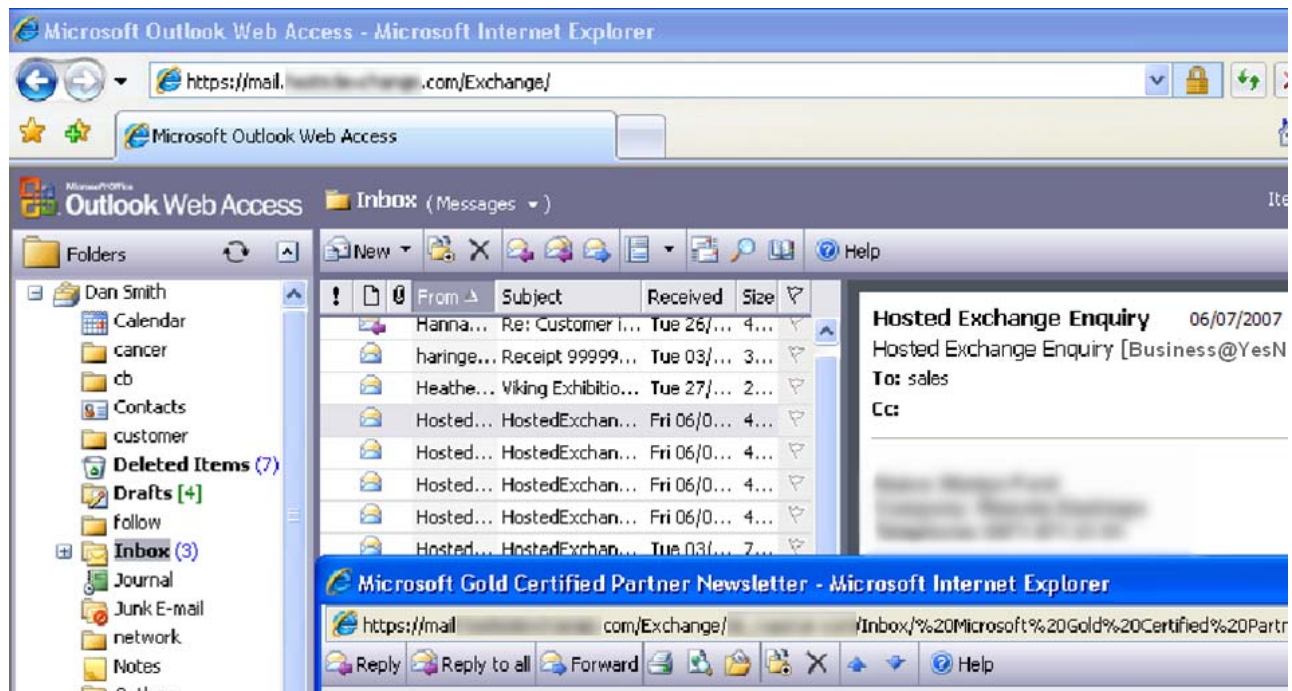

### Microsoft Office Outlook 2007

YesNo.com's Hosted Exchange uses Microsoft's Outlook 2007 email client, which is the industry standard business email client used around the world today. You can simply send, receive and manage your email using this standard business email client.

**A free copy of Microsoft's Outlook 2007 is included for every user.**

### Outlook Web Access (OWA)

OWA is Outlook email in your remote web browser – the end user tool for mobile email. When accessing your email remotely the user experience of desktop Outlook 2007 is mirrored as closely as possible.

**“YesNo.com's great service allows me to access my company email from anywhere in the world”**  
**Neil Bodilly ColourSource Ltd**

## Mobile Email

YesNo.com's Hosted Exchange service allows you to easily access important Email, Calendar and Contact information via mobile devices or from any PC or Mac with an Internet connection.

**Stay ahead of the competition** – let your business be more productive by having access to data from virtually anywhere.

**BlackBerry Enterprise Server** – the YesNo.com BlackBerry Enterprise Solution is a complete push-based wireless solution that ensures all email arrives automatically over the air to your handheld device.

## Windows Mobile

Windows Mobile powered by YesNo.com lets you use your Windows Mobile device (WM5 or WM6) without the cost and complexity of running your own Windows Exchange servers.

It allows you to retrieve e-mail, keep track of your schedule and your contacts, browse the Internet, send and receive text messages, read and compose Microsoft Word Mobile files, make Microsoft Excel Mobile charts, and view Microsoft PowerPoint.

Businesses use Windows Mobile to help their employees keep in touch while out of the office.

## BlackBerry

BlackBerry (BES) powered by YesNo.com lets your BlackBerry Handheld use the BlackBerry Enterprise Server (not the cheap cut down BiS), without the cost and complexity of running your own servers.

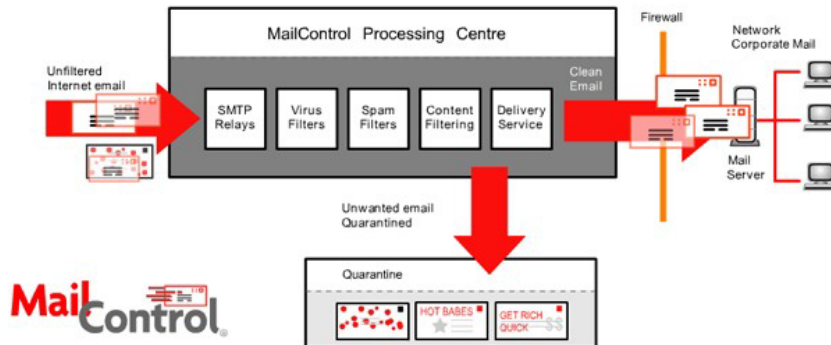

It allows you to retrieve e-mail, keep track of your schedule and your contacts, browse the Internet, send and receive text messages, read Microsoft files including Microsoft PowerPoint Presentations. Businesses use BlackBerry to help them keep in touch while out of the office. You may use the devices to check e-mail, track sales, place orders, and accomplish other tasks by using a variety of line-of-business applications.

## Peace of Mind

Businesses enjoy the peace of mind that comes from having YesNo.com's experts manage their email system and quickly respond to security threats such as spam and viruses. By outsourcing your email to YesNo.com's experts, your business will enjoy the same professional email capabilities that, until now, have only been available to companies with large IT budgets.

### YesNo.com Anti-Virus

YesNo.com's Anti-Virus by MailControl *Anti-Virus* sits at the Internet level, filtering millions of messages every day. This holistic view of all e-mail enables YesNo.com to identify and block viruses and other malware in real-time.

Powered by BlackSpider, MailControl is an on-demand service that minimizes the risk of infection by combining market-leading anti-virus technology with advanced heuristic detection capabilities. Three commercial anti-virus engines work together with SurfControl's intelligent threat prevention technology, Huntsman, that identifies and blocks new virus outbreaks as they occur.

This means you benefit from a greatly reduced window of exposure – the critical period when a new virus can propagate before a fix is developed. We are so confident in our ability to protect your organization from viruses, that we offer a 100% guarantee against passing a known virus to you. Since the service was launched, we have never passed a virus on to any of our customers.

### YesNo.com Spam Filter

YesNo.com Spam Filter by MailControl is an on-demand service, powered by BlackSpider, that intelligently identifies and blocks junk e-mail before it reaches your network.

Highly available global delivery network

Industry-leading customer support

SurfControl's threat intelligence teams continuously improve effectiveness - increasing spam detection rates and reducing false positives

Eliminates over 98% of spam before it reaches your network

End-user self-service features allow users to manage their own quarantine area, including black and white lists, and view or release messages - reducing the burden on IT

# YesNo.com

## Hosted Exchange

YesNo.com's Remote Desktop is at the forefront of the Software-as-a-Service (SaaS) revolution; offering companies the facility to have all their software and data hosted in a purpose-built data centre, rather than on a local network, with access provided over secure high speed connections.

The service is provided on a per-user pay-monthly basis, with a fully-managed service providing software upgrades, data backups and 24-hour telephone support.

Software broadcasting provides an innovative alternative to the traditional on-site local PC and perpetual license model of software delivery.

YesNo.com's Remote Desktop is a core service enabling subscribers to securely access their company data files, 'My Documents', and software applications including Microsoft Office from anywhere on a pay monthly basis.

YesNo.com Hosted Exchange is a hosted exchange email service which enables subscribers to access their email, shared calendar and contacts from any internet connection using Outlook, a web browser or a mobile device such as Windows mobile phones or BlackBerry.
