business@YesNo.com

YesNo.com's Remote Desktop comes with Microsoft Office 2007 as standard. Access your files and work with the very best in business software from Microsoft. All your documents are saved securely in our state of the art data centres protected by physical and logical security.

YesNo.com's Remote Desktop enables you to concentrate on your business and not on your IT.

Microsoft Office 2007 is the latest version of Microsoft's productivity suite. Office 2007 contains a number of new features; the most notable is an

Microsoft Outlook 2007 working with YesNo.com's Hosted Exchange provides you with the very best of business email. YesNo.com's Hosted Exchange guarantees 100% business email to your Remote Desktop. It also provides calendaring, tasks, contacts and note taking.

Microsoft Word 2007 is Microsoft's flagship word processing software. Used through out the worlds largest companies. Microsoft word 2007 supports both new and existing file formats.

Microsoft Excel 2007 is the ubiquitous spreadsheet application. It features calculation and graphing tools which have made excel one of the most popular applications to date.

Microsoft PowerPoint 2007 continues to improve on the world's most popular presentation programme. Create professional presentations for you and your customers.

Microsoft Publisher 2007 is a desktop publishing application. Enabling you to produce press quality pdf, brochures and websites using this simple application, saving thousands of pounds.

Microsoft Access 2007 is a relational database management system from Microsoft which combines the Microsoft Jet Database engine with a graphical user interface.

YesNo.com's Remote Desktop includes a pdf writer and Adobe pdf

Additional Microsoft Office programmes

Additional Office applications such as Visio and Project are available for a small monthly fee.

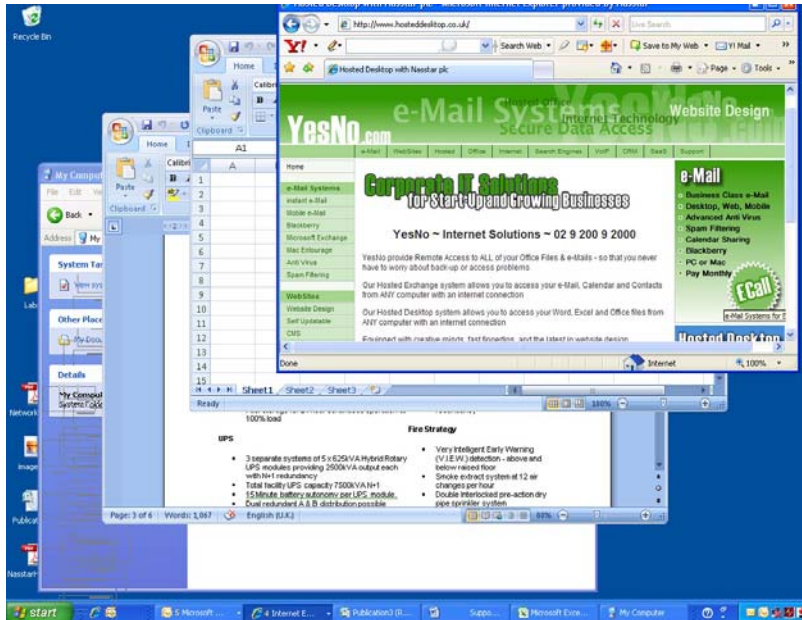

Windows Mobile 5 and **Windows Mobile 6** are supported as standard with Remote Desktop. Access all your email on your mobile.

YesNo.com's Remote Desktop provides an option for **BlackBerry Enterprise Server**. Use your BlackBerry to the maximum with fully synchronised inbox, sent items, contacts and calendars.

You and your staff are enabled with the ability to instantly and securely view computer desktops and email, documents, files, programmes and all other company resources as if sitting in front of your own computer, anywhere in the world.

You will access all your company files and my documents over a secure connection using Citrix Technology.

Citrix is used through out the worlds leading companies providing a secure managed service.

Your programs and documents are stored in highly resilient and secure data centre providing the reliability and peace of mind usually only accessible by big business.

Additional Programmes

YesNo.com's Remote Desktop enables you to not just access Microsoft programmes but to access all the programmes that your business use. You can access your accounts systems, CRM, help desk and other line of business applications.

So, for example, your book keeper could work from a remote site securely accessing your company accounting system or your sales people could access your CRM from home or on the road.

How to access your YesNo.com Remote Desktop

YesNo.com's Remote Desktop can be accessed using an installed Citrix client or from a remote machine over the internet.

To access your programmes and documents from a computer that does not have the installed Citrix client go to the secure web page YesNo.com will create for you (e.g. <https://go.example.com>) follow the simple instructions and you will be up and running in minutes.

Printing

The universal print driver will allow you to connect to your printer and print simply and efficiently.

Minimum Specifications

YesNo.com's Remote Desktop can run across many platforms including Windows 98, 2000, XP and Vista, as well as many flavours of Linux and of course on an Apple Mac or a Dumb Terminal.

The solution requires internet access. We recommend you allow 64K bandwidth for each user up and down stream.

Work smarter not harder

YesNo.com's Remote Desktop service addresses real business issues identified in a survey carried out by the British Chamber of Commerce and Microsoft release in February 2007.

YesNo.com

Remote Desktop

YesNo.com's Remote Desktop is at the forefront of the Software-as-a-Service (SaaS) revolution; offering companies the facility to have all their software and data hosted in a purpose-built data centre, rather than on a local network, with access provided over secure high speed connections.

The service is provided on a per-user pay-monthly basis, with a fully-managed service providing software upgrades, data backups and 24-hour telephone support.

Software broadcasting provides an innovative alternative to the traditional on-site local PC and perpetual license model of software delivery.

YesNo.com's Remote Desktop is a core service enabling subscribers to securely access their company data files, 'My Documents', and software applications including Microsoft Office from anywhere on a pay monthly basis.

YesNo.com Hosted Exchange is a hosted exchange email service which enables subscribers to access their email, shared calendar and contacts from any internet connection using Outlook, a web browser or a mobile device such as Windows mobile phones or BlackBerry.
